

# PHYGITAL PHONICS 2

For Phygital Phonics 2 we are collecting sounds of celebration.  
Pheobe Riley Law has put down some thoughts on celebrations.

A Celebration ~ traditionally defined as a social gathering or enjoyable activity held to celebrate something. A celebration can be private, something you perceive as celebratory. Recording a celebration will be personal to yours or someone else's understanding of something celebrated.

## Alternative ideas of celebration could be:

● Recording a space used for celebration when it's silent / not in use.

● Recording a small moment, discovery or observation in your surroundings such as the sound of a fault in architecture, a balloon that's been lost, the end of a race, opening a chocolate box or the sound of yourself walking on a path that you've never taken before.

● Recording the sound of something that should be celebrated more.

● Recording a meaningful conversation.
